Experience

○ **Victory 247 | Belgrade- iGaming Startup company**
Dec 2022 – Present

● **Junior Frontend Developer** Feb 2023 – Present

- Development and maintenance of the betting platform Frontend closely working with CTO and Senior Frontend Developers
- Mostly used TypeScript, Angular, HTML 5, CSS, SCSS
- Implemented IPS Deposit into the platform
- Developed and implemented the "15 minute payout feature"
- Worked on the transformation of the company platform website into a Responsive Platform

● **QA Automation Tester** Dec 2022 – Feb 2023

- Wrote automation tests in JavaScript using Playwright
- Optimized and streamlined the automation process
- Worked with the manual QA team, teaching them how to best utilize good coding practices to optimize their automated tests

Projects

○ **My personal presentational site**

- After I have finished with my IT education, I decided that making a presentational website would be the best way of showcasing my knowledge. Using vanilla JavaScript, HTML and CSS, I have created the website I initially sent to companies instead of my CV. My Github repository, on which the site materials were repositied, was linked on the page itself.
